

MISS MUSTARD SEED'S[®] MilkPaint[™]

INGREDIENTS

Casein (milk protein), Lime (calcium hydroxide),
Natural Pigments, Plant Based Filler

HOW TO STORE IT

Milk Paint has an indefinite shelf life in powdered form when store in an airtight, sealed container with a desiccant. In retail packaging, 2-3 years due to the nature of the pouch. It is perishable once mixed with water and will last about 1-2 weeks if covered and stored in a cool place. It will require additional water and stirring to reconstitute.

HOW TO USE IT

Clean project thoroughly prior to painting. Mix up paint. Stir and allow to rest until pigments are fully dissolved. Test before using. 2-3 coats may be required for desired look. For smoother finish, let dry and lightly sand with fine grit paper. Remove dust prior to applying finish. MilkPaint[™] requires a top coat for durability. Top coats will deepen the color when applied.

KEY FEATURES

- 100% Natural Ingredients
- No VOCs
- Low Earthy Odor
- Food-contact Safe
- Environmentally Friendly
- Minimal brush strokes/workability
- Versatile: can be used as a stain on raw wood. Can be used on cabinets, floors, walls, furniture, fabric, etc. May require MilkGrip[™].
- No residual odor after drying
- Dries fast (1-2 hours), no extended cure time

ADDITIONAL TIPS

- When mixing, start with one part powder to one part water. Once mixed, add more water or powder to achieve desired consistency.
- Can be applied to slick surfaces (glass, metal, etc.) with the use of MilkGrip[™].
- To create a wash or stain with MilkPaint[™], simply add more water to the mixture.
- For a crackle look, apply a thick coat of paint and add heat or use MilkResist[™] Crackling Agent.
- For some extra help getting the chippy look, use MilkResist[™] Chipping Agent.
